I'm a Full Stack Software Developer who loves designing and building beautiful, precise applications, from front to back. A veteran of the armed forces, my unique background and experience define who I am as a developer. I value clear and open communication, strive for excellence with every application I build, and challenge myself to leave all things better than I found them. As a team member, I endeavor to bring clarity to our mission and goals, and coherency among my peers. I do not hesitate to lift others as I pull. I'm quietly confident, naturally curious, and perpetually working to improve myself as a developer, one application at a time.

Skills

ReactJS
Very Good

NodeJS
Excellent

ExpressJS
Excellent

MongoDB
Very Good

Mongoose
Excellent

APIs
Excellent

JavaScript
Very Good

HTML
Excellent

CSS
Very Good

Frontend
Excellent

Backend
Excellent

Database Architecture		Good

User Experience		Good

Full Stack Software Development		Excellent

Work History

2018-04 - 2018-10   ### Security Host

Disney Parks, Experiences And Products, Anaheim, CA

- Leveraged modern security technologies, critical-thinking, and interpersonal communication skills to identify and deter security threats at one of the nation's highest valued terrorism targets
- Maintained professionalism and coherency, under increased pressure, in a dynamic and always changing environment
- Adapted quickly in order to deliver elegant, effective solutions to security dilemmas

2017-05 - 2017-12   ### Security Professional

Star Protection Agency LLC, Seattle, WA

- Developed security procedures for commercial office locations, leveraging research, analytical thinking, and interpersonal skills to deliver security solutions tailored to the individual client
- With careful attention to detail, and emphasis on the desired outcome, adapted quickly in volatile environments to secure at risk individuals and impede malicious activities

2015-06 - 2017-04   ### Ramp Agent

Southwest Airlines, Seattle, WA

- Led teams of up to 5 individuals, managing loading and unloading operations for commercial aircrafts and ensuring that aircraft and their passengers were moved safely to and from boarding locations
- Maintained accountability of, and provided safe transportation for, upwards of $1M in personal luggage and commercial cargo per shift

2011-07 - 2014-11   ### Combat Engineer

US Army, Joint Base Lewis-McChord, WA

- Led and mentored new recruits as they entered the 14th Engineer Battalion
- Devised a training plan and constructed training resources for soldiers using mine detection equipment in support of Operation Enduring

Freedom
- Served as an integral member of a team, successfully conducting over 3000 hours of combat operations in support of Operation Enduring Freedom

Education

2021-08 - Current **No Degree: Computer Science**

Santiago Canyon College - Orange, CA

2020-12 - 2021-04 **Certificate of Training: Software Development**

General Assembly - San Francisco, CA

Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.

2016-06 - 2018-11 **No Degree: Sociology And Anthropology**

Seattle Central College - Seattle, WA

As a student of sociology at Seattle Central College, I took my learning from pages to practice. Theories and concepts I'd discovered—both in the classroom and in my own studies—greatly assisted my development as a leader in the BSU and my ability to lead the BSU in coalescing with organizations with similar goals.
